

DANIYAL HAYAT

FULL-STACK DEVELOPER & CREATIVE BUILDER

Email: mdaniyalhayyat@gmail.com | GitHub: github.com/DotDaniyal | Portfolio: daniyal-hayat-portfolio.vercel.app

EXECUTIVE SUMMARY

Full-Stack Developer and Native Android Engineer specializing in architecting modern, high-performance web applications (React, Next.js, TypeScript), cross-platform native mobile solutions in Kotlin, and intelligent generative AI pipelines with Google AI Studio and Gemini models. Committed to clean architecture, zero-bloat performance, accessible UX/UI craft, and resilient offline capabilities.

TECHNICAL CORE PROFICIENCIES

- **Frontend Engineering:** React 19, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS v4, HTML5/CSS3, Motion, Responsive Design
- **Mobile & Backend:** Kotlin, Native Android SDK, Room/SQLite, Offline Caching, Node.js, Express, RESTful APIs, JSON
- **AI & Intelligence:** Google AI Studio, Google Gemini SDK (@google/genai), Prompt Architecture, Multimodal Grounding, Agent Logic
- **Tooling & DevOps:** Git, GitHub, Vercel, Vite, Linux/Bash, Figma, Lighthouse Optimization, PWA Standards

SELECTED PRODUCTION PROJECTS & OPEN SOURCE

Official Darul Ifta Irshad us Saileen & Islamic AI | Lead Architect & Full-Stack Developer

Technologies: JavaScript, Tailwind CSS, Kotlin, REST APIs, Google Gemini AI [Live: darulifta-bkfbzf6u.manus.space | GitHub: github.com/DotDaniyal/Official-Darul-ifta-Irshad-us-saileen-]

- Architected high-throughput responsive web platform and native Android mobile apps serving community religious consultation.
- Engineered offline-first local caching in Kotlin to ensure reliable guidance access in remote low-connectivity regions.
- Integrated Gemini AI intelligence pipeline for cited theology research with strict grounding in authoritative archives.

CortexIQ AI Suite & AI Prompt Studio | Creator & Full-Stack Engineer

Technologies: TypeScript, React 19, Google Gemini SDK, Node.js, Express, Vite [Live: daniyal-hayat-portfolio.vercel.app | GitHub: github.com/DotDaniyal/cortexiq-by-dnyl]

- Built full-stack computational intelligence dashboard pairing natural language queries with real-time reactive telemetry.
- Implemented secure Node.js proxy routes to isolate sensitive model credentials from client-side runtime environments.
- Achieved sub-100ms UI responsiveness while rendering live asynchronous AI token streams and analytical metrics.

Hamara Weather — Real-Time Meteorological Tracking | Frontend Engineer

Technologies: JavaScript (ES6+), Weather APIs, CSS3 Modern Flex/Grid, Vercel [Live: hamara-weather.vercel.app | GitHub: github.com/DotDaniyal/Hamara-Weather]

- Developed ad-free live atmospheric conditions tracking dashboard with precision humidity, wind, and forecast telemetry.
- Designed lightweight async pipeline with defensive error handling for edge cases and location network interruptions.

Mystic Match — Algorithmic Mobile & Web Puzzle Game | Game Engineer

Technologies: Kotlin, Android Canvas, 2D Matrix Algorithms, State Machines [Live: mystic-match-rho.vercel.app | GitHub: github.com/DotDaniyal/mystic-match-by-dnyl]

- Engineered bespoke match-3 algorithmic engine in Kotlin with cascading matrix replenishment and fluid touch ergonomics.
- Implemented deterministic state machines to eliminate infinite cascade loops and memory leaks.

Faryal FC Digital Headquarters & DNYL Eyewear Experience | Product & UI/UX Developer

Technologies: React, TypeScript, Tailwind CSS, Motion, Responsive UX [Live: daniyal-hayat-portfolio.vercel.app | GitHub: github.com/DotDaniyal]

- Crafted modern athletic sports hub with interactive rosters, matchday countdowns, and responsive fan drawer.
- Created luxury digital showroom featuring 60 FPS motion transitions, fluid typography, and sub-second asset rendering.

EXPERIENCE & ENGINEERING MILESTONES

Full-Stack Web & Native Android Developer — Independent Software Engineer & Product Builder (2025 — Present)

Architecting end-to-end production web platforms and native mobile apps with strict emphasis on performance, type safety, accessibility, and modern UI craft.

Mobile Application Developer — Native Android & Algorithmic Systems Focus (2024 — 2025)

Mastered Kotlin Android architecture, Room database, offline synchronization routines, and touch-optimized canvas engines.

Frontend Developer — Modern Web Engineering & React Foundations (2023 — 2024)

Built responsive web platforms, async REST API integrations, and component-driven design systems with strict Git version control.

EDUCATION & CONTINUOUS LEARNING

- **Core Computer Science, Algorithms & Software Architecture** — Continuous Academic & Applied Engineering Studies
Data Structures, Algorithm Complexity, OOP in Kotlin/TypeScript, System Design, and Caching.
- **Google AI Studio, Gemini SDK & Generative AI Systems Specialization** — Advanced AI Specialization & Applied Verification (Google Developers & DeepMind)
System instructions, structured JSON schemas, multimodal prompting, function calling, and server-side SDK proxying.
